

Circular for Parents of Classes VI - IX Session 2020-21

SIS/COMP- DEC 002/2020
December 7, 2020

Subject : ICWK 2021: Indian Coding Workshop for Kids

Dear Parents
Namaste

As technology is advancing day-by-day, the automated systems are slowly replacing human workers across many industries. The widespread use of Cyber Physical Systems and Artificial Intelligence in industries is fuelling this trend. The world today needs people with good knowledge of digital technologies and more importantly people with good programming or coding skills, so that they can program the computers, the robots or other machines to perform the specific tasks. Learning to develop a program and accordingly to code it using a particular language greatly enhances the students' problem solving and critical thinking abilities.

We are happy to invite students of Classes VI - IX to enrol in the Coding Workshop being organized by the Teaching Learning Centre (TLC) of BITS, Pilani. The poster for the same is attached herewith.

Kindly motivate your ward to participate in this coding programme by logging onto the following website
